

# PIANO VIRTUAL LESSON SETUP

1. A designated, distraction-free learning space.
2. Practice setting up your camera and testing it BEFORE class begins.
3. Please set up the camera on your device so the student's profile and keyboard can be observed. Students can easily transition between looking at the screen or their piano, and I can easier check their position.
4. Make sure the environment is well lit.
5. Students should sit on a high chair so their elbows are level with the keyboard when they place their hands on the keys. Sitting on a folded blanket is an easy way to raise chair height.
6. Students should have their feet on a box/ book so their feet do not dangle in the air.
7. If you are using a digital keyboard: make sure students turn their volume on a medium level, with a piano sound.
8. A binder for all their music materials within arms' reach.  
All weekly assignments and tutorials will be made available to you through Dropbox. Prior to class, please check your email for a shared Dropbox link and print the weekly PDF assignments.
9. A pencil and highlighter.
